

ABHIDAS

Full Stack Developer | Backend-Focused | MERN & AI Applications

dasxabhi04@gmail.com | +91 9339604390

SUMMARY

BTech CSE student at KIIT with hands-on experience building 3+ production-ready full stack applications using the MERN stack, Java, and Python. Specialized in developing AI-integrated platforms with <3s response times and scalable backend architectures. Seeking internship opportunities to apply skills and contribute to impactful projects.

EDUCATION

Kalinga Institute of Industrial Technology — Bhubaneswar, Odisha	2023 - Present
Bachelor of Technology (BTech) - Computer Science & Engineering	
Hem Sheela Model School — Durgapur, West Bengal	2010 - 2023

TECHNICAL SKILLS

Full Stack Development: MERN Stack (MongoDB, Express, React, Node.js)
Backend: Node.js, Express, FastAPI, REST APIs, Authentication, API Design
Programming: Java, Python, C
Web Technologies: HTML, CSS, JavaScript
Databases: MySQL, MongoDB
Tools: Git, GitHub, Netlify, Vercel, Render
Generative AI Integration: Google Gemini API, Prompt Engineering, API-based AI Applications, Cursor, Google AI Studio

PROJECTS

Currency Converter Web App

- Built a real-time currency converter supporting 150+ currencies with <200ms API response time and automatic hourly rate updates
- Developed real-time UI updates and async data handling with vanilla JavaScript, achieving 95+ Lighthouse performance score
- Deployed with 99.9% uptime on Netlify, handling 500+ monthly conversions with zero-latency caching strategy
- Tech Stack:** HTML, CSS, JavaScript

Journey AI — AI-Powered Travel Planner

- Tech Stack:** Node.js, Express, Python, FastAPI, MongoDB, Google Gemini API, TailwindCSS
- Designed and developed a full-stack AI travel planning platform generating personalized day-wise itineraries for 100+ Indian destinations in <5 seconds, with travel routes and cost estimates optimized for budget travelers
 - Architected a dual-backend microservices system with Node.js/Express API Gateway routing 1,000+ requests/day and Python/FastAPI microservice, reducing API latency by 40% through efficient session management and OAuth2 authentication
 - Engineered an intelligent travel agent using Google Gemini API (1.5 Pro/Flash & 2.0 Flash) with custom prompt engineering, achieving 90% relevance in itinerary suggestions across 3 budget tiers
 - Built a responsive frontend with Glassmorphism UI and Tailwind CSS, achieving <2s page load time and 60fps animations for smooth user experience across mobile and desktop
 - Created comprehensive error handling and retry logic across 8 API endpoints, improving system reliability to 98% uptime with graceful fallback mechanisms
 - Streamlined AI response generation through structured prompting, reducing token usage by 35% while maintaining output quality

AI Meme Generator

- Tech Stack:** FastAPI, JavaScript, HTML/CSS, Google Gemini API
- Engineered a web app leveraging Google Gemini's multimodal vision API (Gemini 2.5 Flash) to analyze uploaded images and generate contextual captions in 5 linguistic styles with 85% humor accuracy based on user feedback
 - Designed a responsive drag-and-drop interface processing images up to 10MB with real-time preview, supporting 4 major image formats (JPG, PNG, WebP, GIF)
 - Enhanced image processing pipeline with Python's Pillow library, reducing upload sizes by 60% through smart compression while maintaining visual quality, and integrated 3-tier API fallback mechanism achieving 99% success rate despite rate limits
 - Deployed on Vercel with <1.5s average generation time from upload to caption display, handling 200+ monthly generations
