

ABHIDAS

Full Stack Developer | Backend Development | AI-Integrated Applications

dasxabhi04@gmail.com | +91 9339604390 | [linkedin.com/in/abhi-das-kiit](https://www.linkedin.com/in/abhi-das-kiit) | github.com/abhidoesntcode | West Bengal, IN

SUMMARY

BTech CSE student at KIIT with hands-on experience building full stack applications using MERN, Java, and Python. Experienced in developing AI-integrated web applications, REST APIs, and backend systems using FastAPI and Node.js. Seeking internship opportunities to apply technical skills and contribute to real-world projects.

EDUCATION

Kalinga Institute of Industrial Technology — Bhubaneswar, Odisha	2023 - Present
<i>Bachelor of Technology (BTech) - Computer Science & Engineering</i>	
Hem Sheela Model School — Durgapur, West Bengal	2010 - 2023

EXPERIENCE

Citi Technology Software Development Virtual Experience Forage	May 2026
- Built a Java application to fetch Dow Jones stock data using Yahoo Finance API and store it in a queue for real-time processing - Created a JavaFX dashboard with line charts to visualize real-time stock price movements - Designed UML diagrams for a loan management system and proposed a machine learning credit risk model	

TECHNICAL SKILLS

Full Stack Development: MERN Stack (MongoDB, Express, React, Node.js)
Backend: Node.js, Express, FastAPI, REST APIs, Authentication, API Design
Programming: Java, Python, C
Web Technologies: HTML, CSS, JavaScript
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems
Databases: MySQL, MongoDB
Tools: Git, GitHub, Netlify, Vercel, Render
Generative AI Integration: Google Gemini API, LLM Integration, AI API Integration, Contextual Prompt Design, API-based AI Applications, Google AI Studio

PROJECTS

Real-Time Stock Price Tracker <i>Tech Stack: Java, Gradle, Yahoo Finance API, JavaFX</i> - Built a Java app that fetches Dow Jones stock prices every 5 seconds using Yahoo Finance API and stores them in a thread-safe queue - Created a JavaFX dashboard with real-time line charts that update as new data comes in - Set up Gradle for dependency management and building the project
Journey AI — AI-Powered Travel Planner <i>Tech Stack: Node.js, Express, Python, FastAPI, MongoDB, Google Gemini API, TailwindCSS</i> - Built a travel planning platform that generates day-by-day itineraries for 100+ Indian destinations using Google Gemini API (1.5 Pro/Flash and 2.0 Flash) - Implemented prompt-engineered itinerary generation across budget, moderate, and luxury travel categories - Built a responsive frontend with Glassmorphism UI using Tailwind CSS - Added retry logic and exception handling across API endpoints to improve reliability View Live Project →
AI Meme Generator <i>Tech Stack: FastAPI, JavaScript, HTML/CSS, Google Gemini API</i> - Engineered a web app leveraging Google Gemini's multimodal vision API (Gemini 2.5 Flash) to analyze uploaded images and generate contextual captions in 5 linguistic styles with high humor accuracy based on user feedback - Designed a responsive drag-and-drop interface processing images up to 10MB with real-time preview, supporting 4 major image formats (JPG, PNG, WebP, GIF) - Deployed on Vercel with <5.5s average generation time from upload to caption display View Live Project →

CERTIFICATIONS

Citi Technology Software Development Virtual Experience - Forage	View Certificate →
MERN Stack - Udemy	View Certificate →
Generative AI Productivity Skills - Microsoft & LinkedIn	View Certificate →
Workshop on AI Tools - Be10X	View Certificate →
Hack-a-Bot Hackathon - UiPath	View Certificate →
Generative AI - Genovate	View Certificate →

SOFT SKILLS

Teamwork, Problem Solving, Leadership, Adaptability Negotiation, Effective Communication, Strategic Planning
